## Technical notes and definitions

### What do the arrows mean?

The arrows show the percentage point difference between you and your comparison for a particular statistic. For example, an upwards-pointing arrow with a '6' next to it means you are ahead of your comparison by six percentage points in this area.

### Why are some of the arrows grey?

In some cases the differences between you and your comparison are not sufficiently large as to be statistically meaningful and the arrows are coloured grey accordingly, to down-weight their visual impact. This could either be because the difference is small or because the percentages being compared are based on small numbers.

### Provider

A higher education provider – a university or college.

### Provider Tariff Group

This report classifies higher education providers by Tariff Group instead of Mission Group, in line with standard UCAS analytical reporting. The Tariff grouping of providers is based on the average levels of attainment of their accepted applicants (summarised through UCAS Tariff points) in a period of application cycles spanning from 2004 to 2011. Each group of providers accounted for around a third of all UK 18 year old acceptances in these cycles, with the following categories: 'Higher tariff', 'Medium tariff', 'Lower tariff'.
